

Mr Balaclava — balaclava print template · Adult 3-hole

Guide only · v1 · 2026-11 · Units: mm · Scale 1:1

Guide only: a guide for planning your design. The final production template is sent with your quote.
All values are typical; sizes, openings and seams are confirmed on your mockup and sample.

- Bleed — fill your artwork to here (usually 10 mm outside the cut line)
- Cut line — where the panel is cut
- Stitch line — the seam, about 6 mm inside the cut line
- Safe zone — keep logos, text and faces inside (usually 15 mm inside the seam)
- Keep-out — about 15 mm around the openings; the binding covers the edge
- Crown and stretch zones — no logos or text; colours can look a little lighter
- A, B, C — matching points; designs that cross a seam should match here

1. Place your artwork on the ARTWORK layer, under the guides; fill every panel up to the bleed line, openings included.
2. Keep logos and text inside the safe zones, away from seams and openings. Hide or delete GUIDES before export.
3. Send vector (AI, PDF, SVG) or 300 dpi raster files at 1:1 with bleed, with Pantone references for key colours.
4. Send only artwork you own or are licensed to use. Colours are confirmed on the mockup and sample.

Stretch fabric moves a little when sewn: a design that crosses a seam can shift by a few millimetres.
Neon and some brand colours cannot be matched exactly. mrbalaclava.com
